Amendments to the Claims

Please consider the claims as follows:

1. (Currently amended) A method for providing a channel information window overlaying a broadcast video, the method comprising:
transmitting a broadcast video presentation from a server to a terminal;
transmitting a bitmap for [the] a channel information window from [a] the server system to [a] the terminal;
receiving at the terminal a signal to activate the channel information window; and
overlaying [at the terminal] the bitmap for the channel information window over the broadcast video on a display associated with the terminal.
2. (original) The method of claim 1, wherein transmitting the bitmap for the channel information window is performed via an out-of-band channel.
3. (Currently amended) The method of claim 1, wherein transmitting the bitmap for the channel information window comprises:
encoding at the server [system] the bitmap for the channel information window to generate an encoded bitmap;
transmitting the encoded bitmap to the terminal;
receiving at the terminal the encoded bitmap;
decoding at the terminal the encoded bitmap to regenerate the bitmap for channel information window.
4. (Cancelled)
5. (Currently amended) A method for navigating between TV channels, the method comprising:
